

The Stewardship Advantage

A Contemporary Governance and
Leadership Model for the Digital Era

About the Programme

WELCOME TO THE STEWARDSHIP ADVANTAGE

Although technological advancements have led to life-changing innovation in recent years, the first two decades of the 21st century have already witnessed two global recessions, socio-political strife, severe resource/income inequality and massive environmental degradation. We live in times where exciting growth opportunities coexist with existential threats to current and future generations.

Can businesses fully exploit the growth opportunities and sustain success without addressing planet Earth's existential crisis? Is it possible to drive superior shareholder returns by addressing the very challenges that are threatening us? If so, will traditional models of leadership, management and governance be adequate?

As some companies have learned the hard way recently, the answer is a big NO. In today's brave new world, we need brave new thinking that creates a win-win-win scenario wherein individuals, organisations and humanity at large can thrive together. *To enable this, business bosses must mature into Steward Leaders.*

Join us at The Stewardship Advantage Programme to learn how Steward Leaders can future-proof organisations by activating the Steward Leadership Compass©. Hear from business leaders who "do well by doing good" as they share their transformational stories of transitioning into Steward Leaders.

Learning Outcomes

A highly interactive developmental experience for business leaders who want to create a better world and thrive personally at the same time as steward leaders.
